Orlov Arms International · simplified balance sheet

As of 20 October 2026, 07:41 EVE time. Movements since the working-budget baseline of 18 October, 07:40 EVE. Figures from EVE (ESI) through auth. All amounts in millions of ISK. Prepared for the directors of The Orlov Family.

1. Position against the baseline

On 18 October the corporation's money was separated from the owner's. The corporation works with a budget of 5,000 M lent by the owner, interest-free and without a repayment date. That loan counts as nothing: the corporation's result is everything above or below it.

Reward ISK still inside the 26 active corporation projects	2,311.0 M	Rewards not yet paid out, read from EVE
Cap Booster 400 stock, 500 units	3.5 M	At cost, 6,989 ISK a unit; 0 units sold since the baseline
Cap Booster 800 stock, 760 units	6.7 M	At cost, 8,813 ISK a unit; 0 units sold since the baseline

Goods bought through projects since the baseline, not sold yet	88.9 M	At what the projects paid for them (106.4 M at Jita's highest buy); Pyerite 38.0, Zero-Point Condensate 20.5, Isogen 13.6, Tritanium 8.1, Mexallon 7.0, Crystalline Isogen-10 1.7
Loyalty points, 1,000 LP	0.8 M	At cost, the LP not used yet
Total assets	**5,474.4 M**	
Liabilities		
Loan from the owner (the working budget)	5,000.0 M	Interest-free, perpetual, extractable when the corporation can bear it
Result: assets above the loan	**+474.4 M**	The corporation's own money

Not included: wallet division 7 (the Director division, 3,221.2 M), the owner's characters' shared wallet. Project goods paid for before the baseline and not sold yet, an estimated 455 M at cost (529 M at Jita buy), were never part of the budget; they count when they sell. Structure income earned since the last transfer to the corporation, 13.9 M, still sits in the structure corporation's wallet.
