As of 20 October 2026, 05:22 EVE time. Movements since the 5 B baseline of 18 October, 07:40 EVE. Figures read live from EVE (ESI) through auth. All amounts in millions of ISK. Prepared for the directors of The Orlov Family.

1. Position against the 5 B baseline

On 18 October the corporation's money was separated from the owner's. The corporation works with a budget of 5,000 M lent by the owner, interest-free and without a repayment date. That loan counts as nothing: the corporation's result is everything above or below it.

Assets	ISK	How it is valued
Master wallet, division 1 (liquid)	2,703.1 M	Balance as EVE reports it now
Reward ISK still inside the 26 active corporation projects	2,311.0 M	Rewards not yet paid out, read from EVE now
Heavy Water stock, 1,990,000 units (listed at 149.9 in Piekura)	214.9 M	At buy value, 108 ISK a unit; 10,000 units sold so far
Goods bought through projects since the baseline, not sold yet	124.8 M	At what the projects paid for them (150.5 M at Jita's highest buy); Zero-Point Condensate 44.3, Pyerite 38.0, Isogen 13.6, Crystalline Isogen-10 9.5, Tritanium 8.1, Mexallon 7.0, Hydrocarbons 4.4
Caldari State loyalty points, 50,000 LP	40.0 M	At cost, 800 ISK per LP, bought from the master wallet on 19 October
Total assets	**5,393.8 M**	
Liabilities		
Loan from the owner (the working budget)	5,000.0 M	Interest-free, perpetual, extractable when the corporation can bear it
Result: assets above the loan	**+393.8 M**	The corporation's own money

Not included: wallet division 7 (the Director division, 3,221.2 M), the owner's characters' shared wallet. Project goods paid for before the baseline and not sold yet, an estimated 516 M at cost (596 M at Jita buy), were never part of the 5 B; they count when they sell. Structure income earned since the last transfer to the corporation, 13.9 M, still sits in the structure corporation's wallet. Wallet divisions 2 (SRP), 3 (LP Buyback) and 4 (Working budget) hold nothing yet.
